

**DENALI**  
DATA SYSTEMS

## Experienced Web and Database Developer

We are looking for an Experienced Web Developer who can provide technical expertise and programming services for complex web applications and client server database projects. This position would require coordination with our development team in a dynamic and innovative environment. This person will work with our team to contribute input on design and planning, execution and success of technical projects. The developer will work closely with cross functional teams so this person must have the ability to communicate effectively with technical and non-technical team members.

Company: Denali Data Systems

Location: Pleasanton, CA
